# YASSER EL-SAYED M. EL-ALFY

*Researcher | KFUPM*

g201406850@kfupm.edu.sa | yas.alfy@gmail.com | LinkedIn | Google Scholar

Yasser El-Alfy is a researcher at KFUPM working on learning-based perception and 3D SLAM. His work focuses on integrating deep learning with traditional robotics to build robust navigation systems for autonomous vehicles and drones.

**CITATIONS: 21 | H-INDEX: 2 | i10-INDEX: 1**

## EDUCATION

**Doctor of Philosophy in Computer Engineering**
King Fahd University of Petroleum and Minerals, Saudi Arabia | 2023-present

**Master of Science in Computer Engineering**
King Fahd University of Petroleum and Minerals, Saudi Arabia | 2021-2022

*CGPA: 3.688*

**Bachelor of Science in Computer & Communication Engineering (BSCCE)**
Ahlia University, College of Engineering, Bahrain | 2018-2020

*CGPA: 3.99*

**High School**
Ahlia Schools, King Fahd University of Petroleum and Minerals, Saudi Arabia | 2012-2014

*Cumulative Grade: 99.92%*

## WORKSHOPS

**Advanced Quantum Computing Workshop**
Saudi Data and Artificial Intelligence Authority (SDAIA) | 11-15 Jan 2026

## PROFESSIONAL EXPERIENCE

**Research Intern**
Center for Communication and Information Technology Research (CCITR), Research Institute, KFUPM | 2020

## RESEARCH STRATEGY

My research focuses on bridging the gap between raw sensor data and high-level spatial understanding. I develop monocular depth estimation models and integrate them into SLAM pipelines to enable 3D mapping without expensive LiDAR hardware.

**Key Focus Areas:**

- Monocular Depth Estimation
- Visual SLAM & Navigation
- Road Anomaly Characterization
- Edge AI for Robotics
- 3D Mapping
- Scene Understanding

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages:** | Java, JavaScript, Visual Basic, Python, TensorFlow, Pytorch, HTML, Assembly, Arduino, VHDL, Verilog |
| **Software:** | Matlab & Simulink, GNU Octave, Sumo Simulator, Cooja/Contiki Simulator, Xilinx, Modelsim, Cisco Packet Tracer, Arduino IDE, mikroc pro, ISIS 7 Professional, Eclipse, Visual Studio, Visual Studio Code, Google Colab, Jupyter Notebook, Microsoft office programs (Word, Excel, PowerPoint, Access), Latex professional editing, Overleaf, Adobe Photoshop, GIMP, Adobe Indesign, DaVinci Resolve, PowerDirector, Kdenlive, Windows Movie Maker, Microsoft Teams, Zoom, Google Meet, Cisco Webex, Blackboard, Moodle |
| **OS:** | Background in different Operating Systems: Windows, Mac, Linux |
| **Other Skills:** | Teamwork and communications skills, Research skills, Video and graphical editing |

## TEACHING ACADEMIC PROFILE

| | |
|---|---|
| **ITCS 122: Introduction to Programming Techniques** | 2018-2020 |
| **ITCS 121: Computer Programming** | 2018-2019 |
| **ITCS 101: Introduction to Computers & IT** | 2018-2020 |
| **ITCS 222: Visual Programming** | 2018-2019 |
| **ITMS 325: Web Applications Design** | 2018-2019 |
| **ITCS 224: Data Structures** | 2019-2020 |
| **ITCS 201: Object Oriented Programming I** | 2019-2020 |
| **COE 301: Computer Organization** | |
| **COE 292: Introduction to Artificial Intelligence** | |
| **COE 412** | |

## TALKS & EVENTS

**Multi-Modal Curriculum Federated Learning for Breast Cancer detection** — Seminar | 26th November 2025, 4:00PM

*Bldg. 22, Room 119, King Fahd University of Petroleum and Minerals (KFUPM)*

## CERTIFICATIONS

| | |
|---|---|
| **IELTS Certificate: 6.5** | 2020 |
| **ICDL Certificates in Microsoft Office (Word, Spreadsheets, PowerPoint)** | 2018 |
| **Certificates of appreciation for being lab assistant, Ahlia Univ.** | 2018 |
| **Qiyas - General Aptitude Test: 100%** | 2014 |
| **Qiyas - Achievement Aptitude Test: 97%** | 2014 |

## PATENTS

## DATASETS

### Road Anomaly Dataset with Depth Ground Truth

*The first pothole dataset with depth ground truth values, manually annotated for high accuracy.*

### Pothole Detection Under Various Weather Conditions Dataset

*A dataset with pothole images and generated/simulated various weather conditions.*
